

The drawing consists of two main parts: a cross-section (top) and a longitudinal section (bottom).

Cross-section (top): Shows a rectangular beam with a total width of 11810 mm and a total height of 11885 mm. The top reinforcement consists of 6 bars of diameter 22 mm (6*D22). The bottom reinforcement consists of 4 bars of diameter 22 mm (4*D22). The distance between the top and bottom reinforcement is 97 mm. The distance between the center of the top bars and the center of the bottom bars is 75 mm. The distance between the center of the top bars and the center of the bottom bars is 135 mm.

Longitudinal section (bottom): Shows the beam along its length, which is 12000 mm (labeled as HEM240 x 12000). The beam is divided into segments with lengths: 657, 200, 1657, 200, 1657, 200, 1657, 200, 1657, 200, 1657, 200, 1657, 200, and 1857 mm. The reinforcement is shown as circles with dots in the center, representing the bars. The top reinforcement is labeled 6*D22 and the bottom reinforcement is labeled 12*D24.
